

Thanks to its skilled employees and the world's most modern fleet, Jan De Nul Group is a leading expert in dredging activities, as well as in services for the offshore industry of oil, gas and renewable energy.

DREDGING

For more than 60 years, the Group has executed international dredging and reclamation projects from start to finish: capital dredging and maintenance works in ports, deepening of channels, beach replenishment, dredging rock or sand banks in open sea conditions. Supporting land reclamation works the company has extensive experience in design and construction of rock revetments.

OFFSHORE

Specialized services for the offshore industries are a key part of the services provided by the Group. They can be divided into four main components: seabed intervention, rock installation and ballasting, offshore wind farms installation, and the installation of subsea cables and umbilicals. The combination with the in-house design department capacity for civil and environmental works offers the perfect match to provide clients with an overall solution for their project on an EPC basis.

SES Techcom Services is a 100% owned affiliate of SES, the world-leading satellite operator with a fleet of over 50 geostationary satellites.

We know that providing connectivity out at sea is a complex operation – but also a vital one for day-to-day operations and crew well-being. That's why we have, for many years, leveraged our skills and knowledge to provide low-cost satellite-based broadband connectivity to the maritime market.

Developed specifically for the shipping industry, our solution delivers high speed internet access which enables download rates of up to 8 Mbit/s, low cost VOIP, data transfer, emailing and web browsing. A reliable and consistent connection is ensured through an in-motion stabilized tracking antenna.

The solution is ideal for short sea commercial vessels, including ferries, fishing vessels and cargo carriers, operating at sea and on in-land waterways, yachts and other leisure craft.

Besides all the advantages of offering high speed internet to the crew, customers also benefit from reduced investment costs, when compared to other conventional maritime solutions.

Maritime Administration

Since the signing of the Luxembourg Maritime Act in 1990, Luxembourg has developed an attractive and reliable jurisdiction for shipping, and ships flying the “Red Lion” have been navigating the seven seas.

Today, the Luxembourg maritime legislation has proven its effectiveness and the Luxembourg maritime sector continues to grow even in a continuously challenging economic environment, and numerous synergies involving the financial, insurance and logistics sector have emerged.

The Luxembourg Maritime Administration supports this sector in a spirit of service while respecting national, European and international regulations. The administration offers a quality service which, since 2000, has led to an ISO 9001 certification.

The Chamber of Commerce is a public institution encompassing all sectors of business (except agriculture and the skilled craft industry) representing the interests of all self-employed individuals, commercial companies, and branches of foreign companies established in Luxembourg.

Today, the Chamber of Commerce has more than 50,000 affiliated members, representing 75% of total employment and 80% of GDP.

The 6 operational missions of the Chamber of Commerce are:

- Involvement in the legislative procedure
- Promoting the creation and development of businesses
- Promoting foreign economic and commercial relations
- Fostering a system of education and training that meets the needs of businesses
- Providing services to business and the general public
- Informing the public and stimulating debate as partner of the market economy (think tank and proposals of policy)

APATEQ provides reliable water and wastewater treatment solutions combining proven membrane filtration technologies with unique pre- and post-treatment processes at the highest levels in terms of performance, quality, safety and economic value. With high ecological efficiency our technologies are designed to, depending on the raw water characteristics and effluent water requirements, reduce or at best eliminate the usage of chemical additives thus reducing operational costs and sustaining the environment.

With the “MarinePaq” for the treatment of scrub water, resulting from the washing of exhaust gases generated during combustion in the engines of large ships, APATEQ offers a first and breakthrough solution that is unique in the world. It is available for on board and onshore operation. When implementing it for their fleet, shipping companies can benefit from a very fast Return on Investment of typically a few months.

The MarinePaq performance is in compliance with present and future legislation, as the modular design of the system easily allows not only capacity increases but also performance increases.

The Luxembourg Maritime Cluster (LMC) has been established in 2008 to promote the local maritime business community and is engaged in numerous activities as business development, spread of knowledge, business intelligence, networking and public affairs, establishment of cross-border and cross-sectorial cooperation. As of today, sixty companies and private institutions actively participate in the initiative.

They operate from Luxembourg in nearly all subsectors of the blue business: merchant marine, dredging activities, banking, financial and consulting services (audit, law, insurance and reinsurance, P&I, ship brokerage, classification, training, strategic consulting), railway and port logistics, marine telecommunications and surveillance services, environment-friendly ship technology, marine biology and equipment.

Chairman of the Luxembourg Maritime Cluster is Mr. Freddy Brackewilist the management of the association is ensured by Mr. Paul Marceul. Former Minister of the Economy Mr. Jeannot Krecké has been appointed Honorary Chairman in 2011.

EuroFlag Services S.à r.l. (EFS) is a Luxembourg-resident company established to carry out ship registration and management services on behalf of shipowners under the Luxembourg flag. Working closely with the Luxembourg Maritime Administration (CAM), EFS has completed more than 120 registration transactions exceeding 1.4m NT and processed 6500+ seafarer applications. EFS-registered ships currently account for over 60% of Luxembourg registered tonnage. EFS endeavours to provide a 24/7 service which helps promote the EU maritime industry's global competitiveness through efficient international regulatory compliance.

Having recently celebrated its 25th anniversary, the Luxembourg ship registry enjoys a reputation as a high quality white-listed flag for preeminent shipowners. EFS' evolving relationship with CAM reflects a shared commitment to maintaining high safety, security, environmental and crew welfare standards while meeting the rigorous demands of the global shipping community. Luxembourg vessel registration affords EU shipowners the opportunity to increase EU tonnage in accordance with EU Maritime Guidelines without jeopardizing the quality and regulatory oversight of their fleet.

As part of its mission to make Luxembourg the preferred EU jurisdiction for EU shipowners, EFS is at the forefront of efforts to create a business-friendly environment hospitable to the needs of EU shipowners within Luxembourg's diversified economy. We welcome your input at Posidonia as we continue to build a dynamic, responsive, accountable and professional EU flag solution.
